Preliminary Engineering Report
February 29, 2012
Mouse River Project
Map 17 of 28

(1) Note: Project limits represent approximate right-of-way required for operation and maintenance of the preliminary flood risk reduction features. Features generally included are levees, floodwalls, pump stations, piping and gatewells, pump station ponding areas, high-flow diversions, channel realignments, overbank excavations, riprap/rubber control measures, boulder drop structures, transportation route structures (including rail and road), river closure structures, interior ponding areas, interior relief roads, and complementary vegetation, irrigation, and drainage structures. See accompanying text, figures, and appendices for project inspection, operation and maintenance.
