(1) Note: Project limits represent approximate right-of-way required for operation and maintenance of the preliminary flood risk reduction features. Features generally included for flood risk reduction features are levees, floodwalls, pump stations, pump station piping and gatewells, pump station ponding areas, high flow diversion, channel realignments, overbank excavations, riprap/erosion control measures, and river closure structures. Transportation closure structures (including road realignments and road closure structures) do not include paved roadway and rail access for project inspection, operation and maintenance.
